Supplementary Figure 2. Leave-one-out plot to visualize the causal effect of the six immune cell traits on keloid risk when leaving one SNP out.

Supplementary Figure 3. Scatter plot showing the causal effect of the six immune cell traits on the risk of keloid.

Supplementary Figure 4. Funnel plots to visualize the overall heterogeneity of MR estimates for the effect of the six immune cell traits on keloid.

Supplementary Figure 5. Forest plot for the causal effect of peripheral immune cells on the risk of keloid.
